

A FUTURES CURRICULUM FOR THE UNIVERSITY OF BIRMINGHAM

#UOBFUTURES

e-Assessment: tech is taking over - how soon until we use iPads in exams?

Paperless lectures: a digital curriculum?

Employability: develop the attributes that employers love to see - incorporate communication and presenting skills into classes!

Placement years: enable more courses to offer a year in industry, so students can gain invaluable experience during their studies.

What will our curriculum look like in the future?

Data: educate students on how to interpret, analyse and play with data.

Accommodate for tastes: promote creative courses like art and music. Create opportunities for new courses - BA Social Media Studies?

Real-life learning: more class debates and case studies based on real-life scenarios, not just textbook!
